The Facts about Kids and the Danger of Drowning

**THE PROBLEM**

Almost 800 children drown in the U.S. every year.

Two thirds of these deaths occur during May – August.

Drowning Risk Varies by Age

- <1 year olds are **more likely to drown at home**
- 1-4 year olds are **more likely to drown in a pool**
- 5-17 year olds are **more likely to drown in natural water**

More than half of all child drowning deaths are among children ages 0 to 4.

**PARENTS’ MISCONCEPTIONS**

**MISCONCEPTION 1**

Nearly half of parents surveyed think that if a child was drowning nearby, they would hear it.

**Reality**

Drowning is silent. There can be very little splashing, waving or screaming.

**MISCONCEPTION 2**

1 out of 3 parents have left a child alone in a pool for two or more minutes.

**Reality**

Drowning is quick. Once a child begins to struggle, you may have less than a minute to react.

**MISCONCEPTION 3**

More than half of parents surveyed think that when present, a lifeguard is the primary person responsible for their child’s supervision at the pool.

**Reality**

Watching your child in the water is your responsibility. A lifeguard’s job is to enforce rules, scan, rescue and resuscitate.
5 Survival Skills That Could Save Your Life in the Water

1. Step or jump into water over your head and return to the surface.
2. Float or tread water for one minute.
3. Turn around in a full circle and find an exit from the water.
4. Swim 25 yards to the exit.
5. Exit from the water. If in a pool, be able to exit without using the ladder.

WATER SAFETY TIPS

- Watch your kids when they are in and around water, without distraction.
- Teach children to swim and the 5 Water Survival Skills.
- Learn CPR and basic rescue skills.
- Make sure pools have four-sided fencing at least 4 feet high.
